

NOTICE OF LAKE DRAWDOWN ON LAKE SHERWOOD FOR DAM REPAIR 2018

This notice is for all residents and users of **Lake Sherwood**. Adams County has obtained a permit from the Wisconsin DNR to drawdown **Lake Sherwood** to complete necessary repair on the dam structure. The permit allows for the lake to be drawn down 7ft below normal level. However it is our intent to only draw down the necessary amount needed to complete the repairs. Prepare to see water levels 12-18 inches lower than normal **starting September 26th through October 15th**. Take the necessary precaution of removing your boats from the lifts or even the lake before the lake level drops.
